

Honey

HONEY GOLD / LOGO & ICON GUIDE

The currency of the Hive

A shared pool of computers powers distributed agent work.

Honey is the currency used to access and run projects.

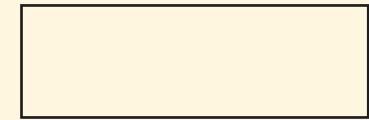

The mark is an H with one continuous vertical currency stroke.

Gold #F5B82E

Charcoal #1D1C20

Cream #FFF6DF

SPACE & SIZE

Keep at least one H-stem width clear on every side.

Use the standard mark at 32 px tall or larger (8 mm in print).

At 16-24 px, use the supplied simplified favicon artwork.

Do not stretch, rotate, add shadows, or change the center stroke.

COLOR & BACKGROUNDS

Use gold on charcoal as the primary app identity.

Use charcoal for small text on cream; gold is an accent color.

Use black or white masters for one-color reproduction.

FILES & PLATFORMS

SVG / PDF: scalable masters; wordmark letters are outlined.

PNG: transparent exports, including 4096 px proofs.

macOS: ICNS and complete iconset. Windows: multi-size ICO.

Linux: PNG sizes and scalable SVG. Web: favicon and PWA icons.

PRODUCTION NOTES

Digital colors are sRGB. Print proofs require the printer's ICC profile.

Arial Bold is used for the outlined wordmark; no font install needed.

Adjacent visual reference: officehours.global. Independent Honey identity.
